Responsibilities: Development and support of medical database. Development and support of corporate site. Corporate network administration.

Education

2012 - 2013: **XXX National Technical University**
Artificial Intelligence Systems
2008 - 2012: **XXX National Technical University**
Computer Science

Languages

Russian and Ukrainian – native
English – pre-intermediate

Recent Projects

Project title	Description	Role
XXX	Web service, where social media creators encounter advertisers from all over the world. Meanwhile companies get hold of the access to the necessary channels. LibertyAds enables the counterparts to make use of an automatic platform, provides both with further promotion as well as offer sufficient analytic tools.	HTML, CSS, JavaScript developer. Responsible for: Back-end / Front-end development Frameworks, libraries: Meteor, jQuery
XXX	Web service with browser extension. Mystery Shopping Platform is a tool used externally by market research companies, watchdog organizations, or internally by companies themselves to measure quality of service, or compliance with regulation, or to gather specific information about products and services. The mystery consumer's specific identity and purpose is generally not known by the establishment being evaluated. Mystery shoppers perform specific tasks such as purchasing a product, asking questions, registering complaints or behaving in a certain way, and then provide detailed reports or feedback about their experiences.	HTML, CSS, JavaScript developer. Responsible for: Back-end / Front-end / Browser extension development Frameworks, libraries: Express, AngularJS, Socket.io, RabbitMQ
XXX	Mobile application that keeping track of daily activities is the best and most natural way to lose weight and live a longer and healthier life. Simply snap a photo and click on it to tag the food or activity. No more trying to remember what was in that sandwich — come back later to tag it.	JavaScript developer. Responsible for: Improvement of an existing mobile application and backend Frameworks, libraries: Backbone.js, Express, Geddy, PhoneGap
